	Jack Dinh	2873
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.		
1. This communication is responsive to <u>01/17/05</u> .		
2. The allowed claim(s) is/are <u>1-15</u> .		
3. The drawings filed on 18 September 2003 are accepted by the Examiner.

## **DETAILED ACTION**

## Terminal Disclaimer

1. The terminal disclaimer filed on 01/17/05 has been reviewed and is accepted. The terminal disclaimer has been recorded.

## **REASONS FOR ALLOWANCE**

2. Claims 1-15 are allowed in light of the Applicant's arguments. The following is a statement of the examiner's reasons for allowance. The present invention relates to an electrophoretic device. Regarding claims 1 and 6, the prior art fails to disclose lyophobic layers having lyophobicity for a microcapsule dispersion in which the microcapsules are dispersed at desired regions of a member and wherein the microcapsule dispersion being applied to the member having the lyophobic layers. Regarding claims 3 and 8, the prior art fails to disclose lyophilic layers having lyophilicity for a microcapsule dispersion in which the microcapsules are dispersed at desired regions of a member and wherein the microcapsule dispersion being applied to the member having the lyophilic layers. Regarding claims 11 and 14, the prior art fails to disclose an electrophoretic layer including microcapsules containing a dispersion medium and particles is disposed in a second area. The claimed invention is distinguished over the prior art by forming lyophobic or lyophilic layers having lyophobicity or lyophilicity, respectively, for a microcapsule dispersion in which the microcapsules are dispersed at desired regions. Thus the claimed invention makes it possible to form an electrophoretic layer containing microcapsules at

Art Unit: 2873

a desired region readily and accurately. The claimed invention is therefore considered to be in condition for allowance as being novel and non-obvious over prior art.

3. The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 USC 102 or 103 would be improper. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Other Information/Remarks

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Dinh whose telephone number is 571-272-2327. The examiner can normally be reached on M-F (9:30 AM - 6:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Georgia Y Epps can be reached on 571-272-2328. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
